- Used to pick up & move boat lifts
- Light weight all aluminum design: 4 pounds each
- Works on square, rectangular or even round corner post up to 4" across
- Locks onto vertical post when lifting — no tools needed
- 24" long handle for easy lifting
- Rated at over 200 lbs each
- Sold individually
- DAKA Lift Bars even float!

One thing you learn real fast when trying to move a boat lift is that you can't pick up on the carriage. That usually means that you need to grab a vertical corner post but they're hard to get a hold of. Now with DAKA Lift Bars, you can conveniently do just that. Grab and lift a vertical corner post with ease. Four bars and some help lets you pick up and move a lift effortlessly in and out of the water.
